

## Curriculum Vitae: J. E. Jack Reeves Eyre

ERT Inc.  
14401 Sweitzer Lane, Suite 300  
Laurel, MD 20707

jack.reeveseyre@gmail.com  
jack.reeveseyre@noaa.gov

Full name (last, first): Reeves Eyre, James Edward Jack

### EDUCATION

**Ph.D.**, Hydrometeorology, University of Arizona, Tucson, AZ May 2020  
Dissertation: Understanding atmosphere-ocean-land-ice interactions in the Earth system.

**M.S.**, Hydrometeorology, University of Arizona, Tucson, AZ December 2016  
Thesis: Evaluation of Greenland near surface air temperature datasets.

**B.A.**, Astrophysics, University of Cambridge, U.K. June 2008

### EMPLOYMENT AND RESEARCH EXPERIENCE

*Ocean monitoring and data assimilation scientist* April 2022 – present  
ERT Inc. at NOAA Climate Prediction Center

- Creating tools and databases for comparing operational climate model output with in situ observations in near real time.
- Conducting climate model experiments to better understand the physics of major climate modes, and how observing network design may affect simulations.

*Postdoctoral scholar* September 2020 – April 2022  
Cooperative Institute for Climate, Ocean and Ecosystem Studies  
University of Washington, Seattle, WA

- Analyzing Saildrone ocean surface observations to improve understanding of ocean-atmosphere interactions near abrupt fronts.

*Postdoctoral research associate* June 2020 – August 2020  
University of Arizona, Tucson, AZ

- Analyzed atmosphere and ocean observational data and model simulations to improve understanding of surface-atmosphere interactions in the Earth system.
- Collaborated with colleagues to develop, write and publish peer-reviewed journal articles.

*Graduate research assistant* January 2015 – May 2020  
Advisor: Xubin Zeng, Department of Hydrology and Atmospheric Sciences, University of Arizona

- Implemented and tested alternative ocean surface flux parameterizations in the Department of Energy's Energy Exascale Earth System Model.
- Provided a unified observation-based view of the Amazon water cycle, combining atmosphere, land and ocean data to enable holistic model assessment.
- Performed first global analysis of model ocean barrier layers, including comparison with observations and attribution of model biases.

- Used in situ observations over the Greenland ice sheet to assess near-surface air temperature from satellite, reanalysis, model and gridded climate monitoring data sets.

*Climate scientist*

May 2011 – May 2014

Met Office Hadley Centre, Exeter, UK

- Climate Monitoring and Attribution group: analysis, quality control and management of real-time climate data; effects of atmospheric circulation on UK temperature and precipitation variability; interpolation methods for relative humidity observations; consultancy reports for construction, energy and government sectors.
- Sabbatical project with Atmospheric Processes and Parameterizations group (May - November 2012): Analyzed high resolution (100 m horizontal grid spacing) modeling of stratocumulus cloud, focusing on the effects of improved turbulence representation on cloud and precipitation.

*Weather forecaster*

March 2009 – May 2011

Met Office, Exeter and RAF Lossiemouth, UK

- Provided bespoke weather forecasts for military fast jet missions and associated airfield operations.
- Interacted with customers face-to-face on a daily basis in a fast-paced, weather-sensitive operational environment.

**PROFESSIONAL SERVICE**

Peer reviews for: Journal of Geophysical Research Atmospheres, Journal of Climate, Nature Scientific Reports, Journal of Advances in Modeling Earth Systems.

Co-chair, Best Practice and Interoperability Experiments theme team, Observing Air-Sea Interactions Strategy (OASIS) program. 2022

Group coordinator, Zeng research group. 2018–2020

Social chair, University of Arizona Hydrology and Atmospheric Sciences Student Association. 2016

Co-organizer, Met Office Hadley Centre weekly seminar series. 2012–2014

Co-organizer, 8th European Climate Support Network Data Management Workshop, Edinburgh, UK. 2011

**AWARDS AND HONORS**

Krider Endowed Scholarship in Atmospheric Sciences 2018

College of Science Graduate Student Award for Scholarship 2018

Outstanding Poster Award, *98th American Meteorological Society Annual Meeting, 31st Conference on Climate Variability and Change*, Austin, Texas, USA 2018

College of Science Galileo Circle Scholarship	2016
Outstanding Poster Award, <i>12th European Meteorological Society Annual Meeting and 9th European Conference on Applied Climatology</i> , Łódź, Poland	2012
